

Brose Display Allround

The stylish all-in-one solution

The name says it all – the elegant Brose Display Allround is a stylish all-in-one solution for any bike. The six buttons are embossed for a sure feel and ergonomically placed to allow quick and easy access to all features. All functions are displayed on a 1.5-inch convex colour screen. The values that are shown can be individually selected for maximum convenience. The Brose Display Allround features a backlight function for optimum readability in both darkness and direct sunlight. The screen brightness can be adjusted either manually or in automatic mode. The convex screen can be mounted to the handlebar on either the left or right and hugs it beautifully. Tipping the scales at just 50 grams, the Brose Display Allround weighs no more than a smartwatch. It has a direct connection to the digital Brose Service Tool, enabling quick and easy diagnosis and maintenance by certified dealers.

Brose Display Remote

Ideal for purists

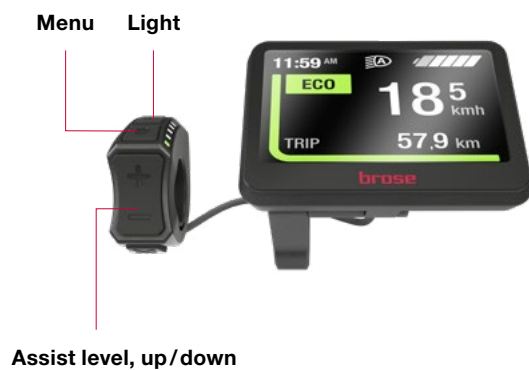

For e-bikers looking for minimalist flair with all the functionality, the slimline Brose Display Remote, which hugs the handlebar, is just the job. An LED strip display in a slender but rugged casing indicates battery charge, assist level, walk assist and error information. All important functions such as the assist level, light and walk assist are stored in six easy-to-feel buttons. The smallest Brose Display can be flexibly mounted to the handlebar on either the left or right and hugs it beautifully. This display is especially suited to riders who take a less-is-more approach to how their bike should look. It has a direct connection to the digital Brose Service Tool, enabling quick and easy diagnosis and maintenance by certified dealers.

Product name	Brose Display Remote	Protection class	IPX7 (HMI) waterproof

Brose Display Central

For a full overview

The screen-only Brose Display Central takes readability to the max under any conditions. Its 3.5-inch, high-definition colour screen lets cyclists take in all the stats at a glance. The Brose Display Central features a backlight function for optimum readability in both darkness and direct sunlight. The screen brightness can be adjusted either manually or in automatic mode.

Thanks to the central position on the handlebar, the e-biker always has a perfect view of the personalised values on the display. The Brose Display Central is ergonomically controlled via the Brose Remote, whose LEDs are switched off in this combination to prevent redundant information. It has a direct connection to the digital Brose Service Tool, enabling quick and easy diagnosis and maintenance by certified dealers.
